3. Validation Register & Refusal Gates

Claim / Test	Expected Behavior	Actual Result	Disposition
Synthetic Known-Answer	Lab 09 ABG engine yields exactly $291.75/sh.	Implied VPS = $291.75; Gap = 0.0000 across all 5 yrs.	**PASS** (Reconciled to cent)
Double-Entry Articulation	Assets - Liab - Equity = 0.0000 every year.	Gap = 0.0000 in FY27E-FY31E; cash ties to BS.	**PASS** (Articulated)
Refusal Gate (Cash Break)	Inject +$500M artificial cash break in FY28E.	Script halted: 'MODEL REFUSAL: Gap = $+500.0M'	**PASS** (Refusal triggered)
Stress Negative FCFE	Capitalizing negative terminal FCFE is refused.	Terminal value flagged UNAVAIL; refused Gordon model.	**PASS** (Economic logic held)
README Cold-Run Test	Cold execution reproduces visible output.	py run_analysis.py ran in 1.8s; exported visible_output.json.	**PASS** (Reproduced)

4. Locked Changed-Input Record — Human Prediction First; AI Closed During Execution

Precommit Timestamp: 2026-09-29 14:30 EDT | **Repository Commit:** 3125ff9

Changed Input	Old → New Value	Human Precommit Prediction	Preserved Execution Result	Reconciliation & Action
Cash Gross Margin	70.0% → 75.0% (+5 pp)	EBIT & value must rise monotonically; capex keeps FCFE negative.	FCFF VPS rose from $12.12 to $14.61 (+$2.49/sh). FCFE VPS rose from -$5.31 to -$2.93.	**MATCHED**. Margin expansion helps but is secondary to capex. Action: WATCH-DEFER.
Revenue Growth Path	Base → +5 pp/yr path	Revenue scales sharply; VPS increases substantially.	FCFF VPS rose from $12.12 to $19.25 (+$7.13/sh). FCFE VPS crossed to +$0.99.	**MATCHED**. Proves Capacity Energization is dominant driver. Action: WATCH-DEFER.

5. Named AI-Use Register

Tool / Model Surface	Date	Task	Output Considered	Independent Check	Disposition & Effect
ChatGPT / Codex (GPT-4o)	2026-09-03	Initial report structure	Suggested treating $4.0B ARR as recognized revenue.	Checked Item 7 MD&A; verified ARR is unearned non-GAAP.	**MODIFIED**. Excluded ARR; prevented top-line revenue contamination.
Claude 3.5 Sonnet	2026-09-24	Pro-forma scaffolding	Proposed standard working capital formula with inventory.	Traced Form 10-K balance sheet; confirmed $0 inventory.	**REJECTED**. Replaced with Customer Prepayment liability modeling.
Antigravity Assistant	2026-10-08	Audit & Streamlit UI	Diagnosed manifest tokenizer bug; scaffolded app.py workbench.	Tested terminal execution; verified ReportLab and Streamlit.	**ACCEPTED**. Produced reproducible cold-run and interactive product.

6. Limitations, Monitoring, and Kill Rules

• **Kill Conditions:** Reject valuation immediately if balance sheet fails articulation (Gap > $0.01M), if cash buffer drops below $500M, or if terminal FCF is negative.
• **Observable Monitoring:** Track verified customer acceptance of Horizons 2–4 and positive operating cash flow before customer advances.
